

Being invested in every market weather pays off in the long run. A single fund for a sound portfolio basis. Through our ČSOB Konzervativní fund, you invest in world brands such as **Apple, Facebook, Google (Alphabet), Amazon, Louis Vuitton (LVMH), Mercedes-Benz (Daimler), ING, Allianz or Johnson & Johnson.**

Why to invest here?

- Simple solution for both beginning and more experienced investors.
- You share the success of firms from all over the world.
- The broad investment distribution reduces the risk of value fluctuations.
- Thanks to managing the **currency risk** you do not need to worry about the CZK exchange rate changes.

Tip: Invest regularly from CZK 500 per month.

What do you invest in?

- We are selecting successful companies from the world's strongest economies – America and Europe – that we complement with prospective young markets.
- Thanks to the fund you indirectly invest in more than **4,000 shares, bonds, commodities or real estate investments**; the wide scope reduces the risk.
- The distribution of the investment is **managed by a portfolio manager** who is guided by the **long-term investment strategy** of our ČSOB/KBC Group. They also track market trends for you and **invest according to the current situation.**

! Before investing we recommend to get familiar with risks on page 2 in section What you should know.

"I monitor long-term strategy and current trends for you and I seek opportunities for you where I expect the best return. I combine fund components to get you stable long-term return."

Petr Kubec, portfolio manager of the fund, has more than 20 years of experience in investment and financial markets.

Who is the fund for?

The fund is for clients with an investment profile:

Very defensive and higher

You do not know what it means?

This type of client emphasizes the balance between the return potential and the volatility of the investment value. He expects a return typically exceeding the return on ordinary bank deposits.

Product score: Allows the comparison of the savings and investment products from the ČSOB/KBC Group in terms of risk. It takes into account amongst others the volatility of the investment.

If you are using portfolio investment advisory, ask your investment adviser to evaluate whether this product is suitable for you.

Synthetic risk and return indicator (SRRI) 3 on the scale from 1 to 7

It is based on legislation and allows for the comparison of collective investment funds in the market. It shows the historical variability of the fund value and hence the riskiness of the investment, but it has a limited use to estimate the risk in the future.
