

ČSOB Dluhopisový is an investment fund that invests in government and corporate bonds, either through direct positions or funds. The fund further invests in money market instruments. For direct bond positions investment grade rating is a pre-condition. **The fund's investment strategy is set to be flexible. ČSOB Dluhopisový fund represents the optimal composition of the bond component of the portfolio and is suitable for the whole interest rate cycle.**

Bond funds have their place in every well-structured client portfolio because they spread the risk and can help its overall performance. Their significance is important due to the low dependence on the development of stock markets and the "mirror" dependence on the development of interest rates.

Why to invest here?

- The fund is suitable as your portfolio's base bond component.
- The fund is actively managed both in terms of its duration and its composition to represent the optimal bond component of the portfolio.
- The fund may also invest in securities denominated in foreign currencies. Currency risk is mostly hedged.

Tip:
Invest regularly
from CZK 500
per month.

Further information about the fund

- The minimum recommended investment horizon is 4 years.
- The average duration of bonds in the portfolio ranges between 1 and 5 years.
- The fund's assets are managed by ČSOB Asset Management, a.s., investment company.

Before investing we recommend to get familiar with risks on page 2 in section What you should know.

How to start?

In order to start investing, it is sufficient to sign a contract with us at the branch. Then you can use our consultancy or the ČSOB Investice portal.

When you can withdraw money?

You can withdraw money from the fund at any given business day at the current market value. You will have the paid up amount on your account within two business days, and you will not pay any fees.

„ČSOB Dluhopisový, as the flagship of our bond strategy, is a suitable building block for every investment portfolio. The large room for maneuver in duration management allows the fund to function well in any market conditions.“

Radim Kotrouš, portfolio manager of the fund, has more than 20 years of experience in investment and financial markets.

Who is the fund for?

The fund is for clients with an investment profile:

Very defensive and higher

You do not know what it means?

This type of client prefers low fluctuations in the value of investments to yield. This client expects a yield that is slightly above regular bank deposits.

Product score: Allows the comparison of the savings and investment products from the ČSOB/KBC Group in terms of risk. It takes into account amongst others the volatility of the investment.

If you are using portfolio investment advisory, ask your investment adviser to evaluate whether this product is suitable for you.

Synthetic risk and return indicator (SRRI) 3 on the scale from 1 to 7

It is based on legislation and allows for the comparison of collective investment funds in the market. It shows the historical variability of the fund value and hence the riskiness of the investment, but it has a limited use to estimate the risk in the future.

Fees

Fund entry fee¹⁾	0.5% from invested amount
Fund exit fee	0% from withdrawn amount

¹⁾ It concerns a distributor's fee for acquiring purchase. The administrator's entry surcharge is zero.

What you should know

The value of the investment may fluctuate over time; the return on the invested amount is not guaranteed.

Significant risks of this fund comprise:

- Market risk, which consists in the possibility of unfavorable development of asset prices in the fund portfolio.
- Credit risk is a situation where securities issuers do not repay their commitments. The fund takes a medium risk because it can buy funds investing in bonds with a lower rating (non-investment grade).
- The risk of inflation means the risk of depreciation of the purchasing power of an asset by rising prices of goods and services in the economy.

The fund may invest in investment securities, money market instruments, securities or book-entry securities issued by the collective investment fund, deposits, financial derivatives, liquid assets and other instruments. The performance of the fund may be affected in connection with the statutory contribution of banks to the resolution fund.
