

History shows that who wants to earn money should as a smart investor have at least a part of the portfolio in equity ČSOB Bohatství invests in attractive companies that set the pace of current times. The Internet and mobile communications are intermingled with our lives (Alphabet, Apple). On-line we can purchase goods and holidays (Amazon, Booking). Each bathroom has a space for cosmetics (L'Oréal or Estée Lauder). We can make hot days more enjoyable with Magnum (Unilever) ice cream or freshen up with the most popular soft drink (Coca-Cola). We pay for it all by card (Visa, MasterCard).

Why to invest here?

- You invest in constantly growing companies around the world in order to share their success.
- The fund is managed by our experts who track the development of the markets for you and invest according to the current situation.
- Currency risk is mostly hedged. In case the cost of hedging is deemed disproportionately high, the foreign currency positions may be partially unhedged.

What do you invest in?

- Mutual fund ČSOB Bohatství invests in reputable companies, which promise long-term growth.
- You will be a co-owner of big brands like Alphabet (Google), Apple, L'Oréal, Visa, MasterCard, Unilever, Coca-Cola, Daimler, LVMH (Louis Vuitton) and way more.

! Before investing we recommend to get familiar with risks on page 2 in section What you should know.

"I manage the bond component so that you can sleep peacefully."

Martin Horák, portfolio manager of the bond component of the fund, has more than 20 years of experience in investment and financial markets.

Who is the fund for?

The fund is for clients with an investment profile:

Defensive and higher

You do not know what it means?

This type of client emphasizes the balance between the return potential and the volatility of the investment value. He expects a return typically exceeding the return on ordinary bank deposits.

Product score: Allows the comparison of the savings and investment products from the ČSOB/KBC Group in terms of risk. It takes into account amongst others the volatility of the investment.

If you are using portfolio investment advisory, ask your investment adviser to evaluate whether this product is suitable for you.

Synthetic risk and return indicator (SRRI) **4** on the scale from 1 to 7

It is based on legislation and allows for the comparison of collective investment funds in the market. It shows the historical variability of the fund value and hence the riskiness of the investment, but it has a limited use to estimate the risk in the future.
